

Creating Value in Colombia
December 2018

General Advisory

The information contained in this presentation does not purport to be all-inclusive or contain all information that readers may require. You are encouraged to conduct your own analysis and review of Gran Tierra Energy Inc. ("Gran Tierra", "GTE", or the "Company") and of the information contained in this presentation. Without limitation, you should read the entire record of publicly filed documents relating to the Company, consider the advice of your financial, legal, accounting, tax and other professional advisors and such other factors you consider appropriate in investigating and analyzing the Company. You should rely only on the information provided by the Company and not rely on parts of that information to the exclusion of others. The Company has not authorized anyone to provide you with additional or different information, and any such information, including statements in media articles about Gran Tierra, should not be relied upon. No representation or warranty, express or implied, is made by Gran Tierra as to the accuracy or completeness of the information contained in this document, and nothing contained in this presentation is, or shall be relied upon as, a promise or representation by Gran Tierra.

An investment in the securities of Gran Tierra is speculative and involves a high degree of risk that should be considered by potential purchasers. Gran Tierra's business is subject to the risks normally encountered in the oil and gas industry and, more specifically, certain other risks that are associated with Gran Tierra's operations and current stage of development. An investment in the Company's securities is suitable only for those purchasers who are willing to risk a loss of some or all of their investment and who can afford to lose some or all of their investment. You should carefully consider the risks described under the heading "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2017 and in the Company's other SEC filings.

In this presentation, unless otherwise indicated, all dollar amounts are expressed in U.S. dollars. All production, reserves and resources are working interest before royalties ("WI"). Please see the appendices to this presentation for important advisories relating to the Company's presentation of oil and gas information and financial information, including the presentation of non-GAAP measures, available at www.grantierra.com. Current market values are based on a NYSE share price of US\$2.37 as at close on Dec. 14, 2018 and 391.3 million issued and outstanding shares as of Oct. 30, 2018.

Forward-Looking Information Advisory

This presentation contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and financial outlook and forward looking information within the meaning of applicable Canadian securities laws (collectively, "forward-looking statements"). All statements other than statements of historical facts included in this presentation regarding our financial position, estimated quantities and net present value of reserves, business strategy, plans and objectives for future operations, capital spending plans and those statements preceded by, followed by or that otherwise include the words "believe", "expect", "intend", "anticipate", "forecast", "will", "estimate", "target", "project", "goal", "plan", "should" or similar expressions are forward-looking statements. Such forward-looking statements include, but are not limited to, statements about: future projected or target production and the growth of production including the product mix of such production and expectations respecting production growth; our ability to grow in both the near and long term and the funding of our growth opportunities; our possible creation of new

core areas; our prospects and leads; the plans, objectives, expectations and intentions of the Company regarding production, exploration and exploration upside, drilling, permitting, testing and development; Gran Tierra's 2018 capital program including the changes thereto along with the expected costs and the expected allocation of the capital program; and Gran Tierra's financial position and the future development of the company's business. Statements respecting reserves are forward-looking statements as they involve the implied assessment, based on estimates and assumptions, that the reserves and resources described exist in the quantities predicted or estimated and can be profitably produced in the future.

Estimates of future production, cash flow guidance and certain expenses may be considered to be future-oriented financial information or a financial outlook for the purposes of applicable Canadian securities laws. Financial outlook and future-oriented financial information contained in this presentation about prospective financial performance, financial position or cash flows are based on assumptions about future events, including economic conditions and proposed courses of action, based on management's assessment of the relevant information currently available, and to become available in the future. In particular, this presentation contains projected production and operational information for 2018, 2019 and 2020. These projections contain forward-looking statements and are based on a number of material assumptions and factors set out above. Actual results may differ significantly from the projections presented herein. These projections may also be considered to contain future-oriented financial information or a financial outlook. The actual results of Gran Tierra's operations for any period will likely vary from the amounts set forth in these projections, and such variations may be material. See above for a discussion of the risks that could cause actual results to vary. The future-oriented financial information and financial outlooks contained in this presentation have been approved by management as of the date of this presentation. Readers are cautioned that any such financial outlook and future-oriented financial information contained herein should not be used for purposes other than those for which it is disclosed herein. The Company and its management believe that the prospective financial information has been prepared on a reasonable basis, reflecting management's best estimates and judgments, and represent, to the best of management's knowledge and opinion, the Company's expected course of action. However, because this information is highly subjective, it should not be relied on as necessarily indicative of future results.

The forward-looking statements contained in this presentation are based on certain assumptions made by Gran Tierra based on management's experience and perception of historical trends, current conditions, anticipated future development and other factors believed to be appropriate. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond Gran Tierra's control, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. These include the factors discussed or referenced under the heading "Part 1. Item 1A. Risk Factors" in Gran Tierra's 2017 Annual Report on Form 10-K, under the heading "Part II. Item 1A. Risk Factors" in Gran Tierra's Quarterly Reports on Form 10-Q and in the other reports and filings with the Securities and Exchange Commission.

All forward-looking statements speak only as of the date on which such statements are made, and Gran Tierra undertakes no obligation to correct or update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law. Gran Tierra's forward-looking statements are expressly qualified in their entirety by this cautionary statement.

COMPANY SNAPSHOT

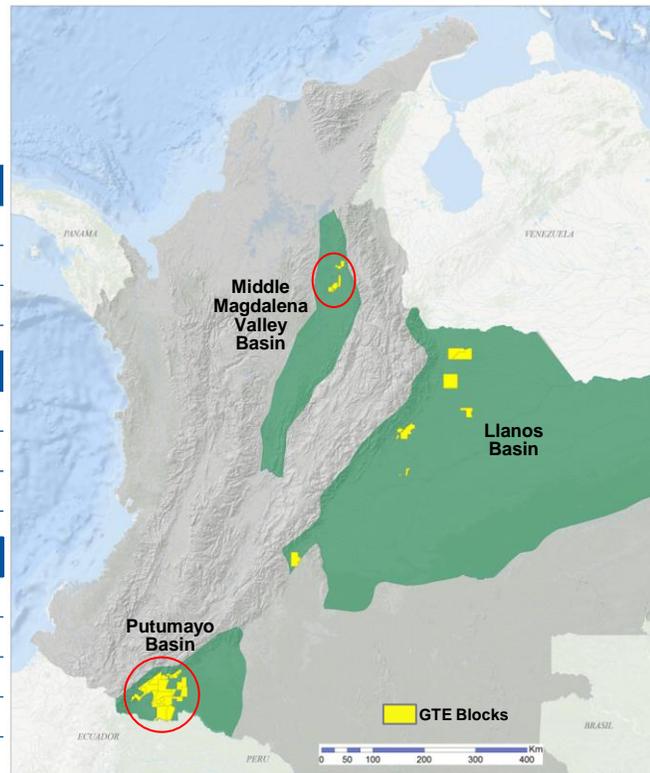

Gran Tierra: publicly listed, independent international exploration & production company focused in onshore Colombia

Operating Statistics	2016	2017	2018E	2019E
W.I. Production (boepd) ¹	26,216	31,426	36,500-38,500	40,000-42,000
Cash Flow (US\$MM) ²	\$93	\$190	\$330-\$340	\$365-\$375
Capital Expenditures (US\$MM)	\$128	\$251	\$320-\$330	\$350-\$370

2017 Reserves ³	MMBOE	RLI	NPV10 BT
1P	74	5.7 years	US\$ 1.4bn
2P	137	10.6 years	US\$ 2.5bn
3P	203	15.7 years	US\$ 3.6bn

Current Market Values

Market Capitalization	US\$ 0.93 bn
Net Debt ⁴	US\$ 0.31 bn
Enterprise Value	US\$ 1.23 bn
Ticker Symbol – NYSE American/TSX/London	GTE:US/GTE:CN/GTE:LN
Volume (avg. 30-day combined trading volume)	3.13 MM shares

High quality diversified asset base: 100% light-medium oil & over 90% operated

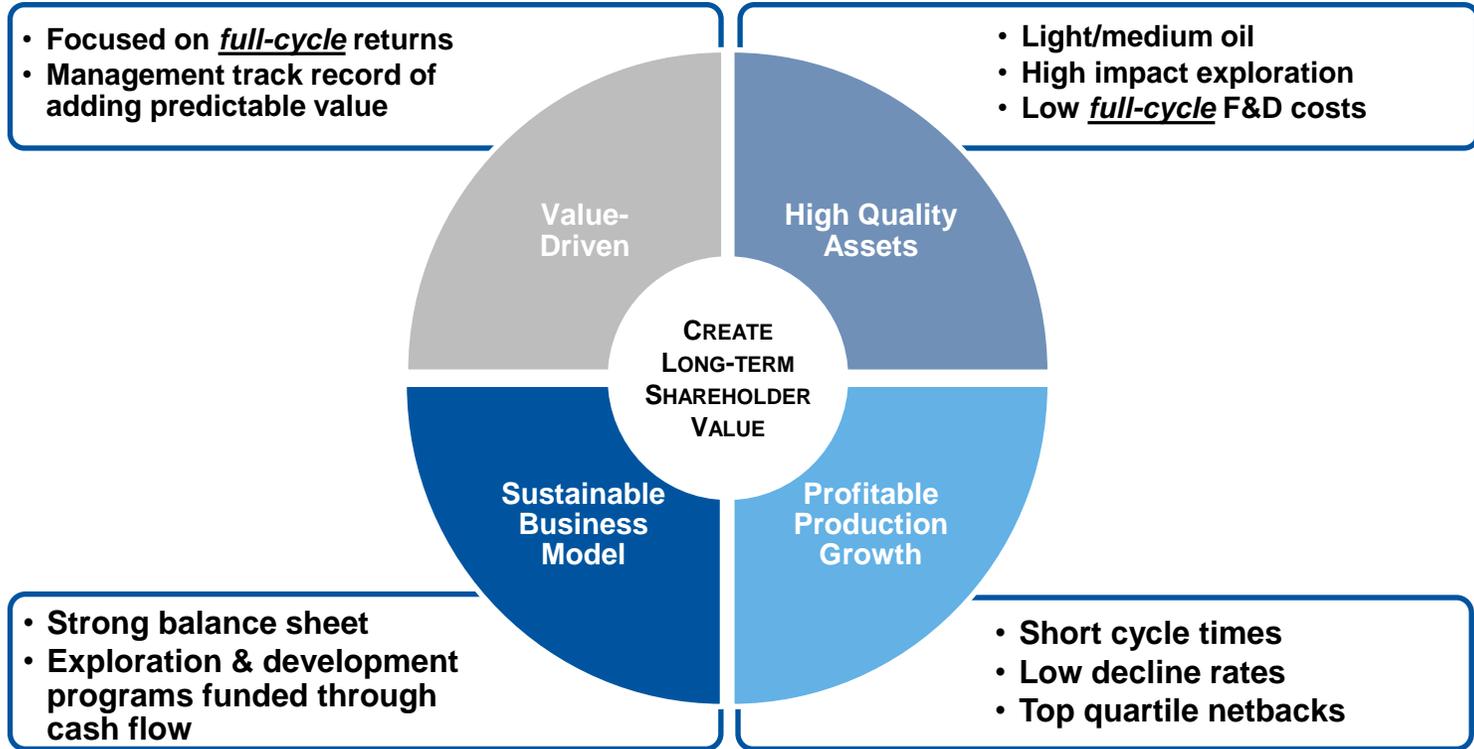

1. Colombia WI production

2. "Cash flow" means the GAAP measure "net cash provided by operating activities"

3. Based on 2017 McDaniel Reserve Report

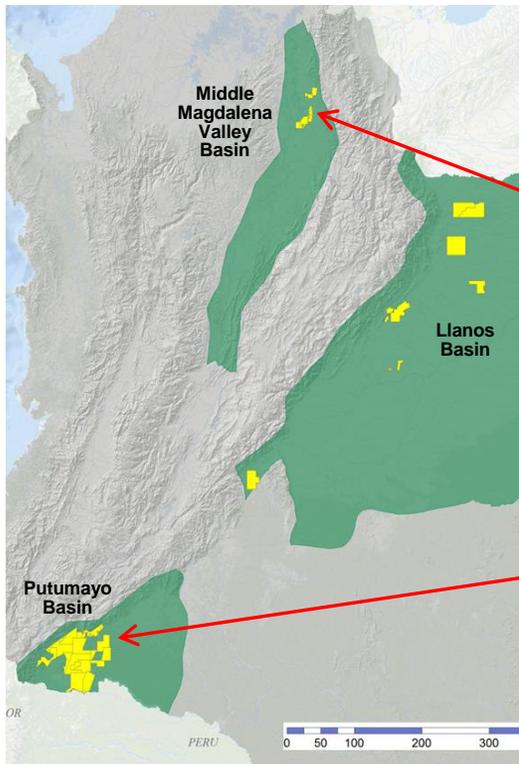

4. Net debt at Sept.30/2018 of \$306MM (non-GAAP) is Q3/18 working capital, less \$115 million in senior convertible notes and \$300 million in senior notes; see "Presentation of Oil & Gas Information" in appendix for more information

GRAN TIERRA – EXCELLENT VALUE PROPOSITION

Key objective: grow NAV/share by 3-5 times within 5 years

Q4/2018 – Q1/2019: KEY CATALYSTS¹

All wells GTE-operated, 100% Working Interest

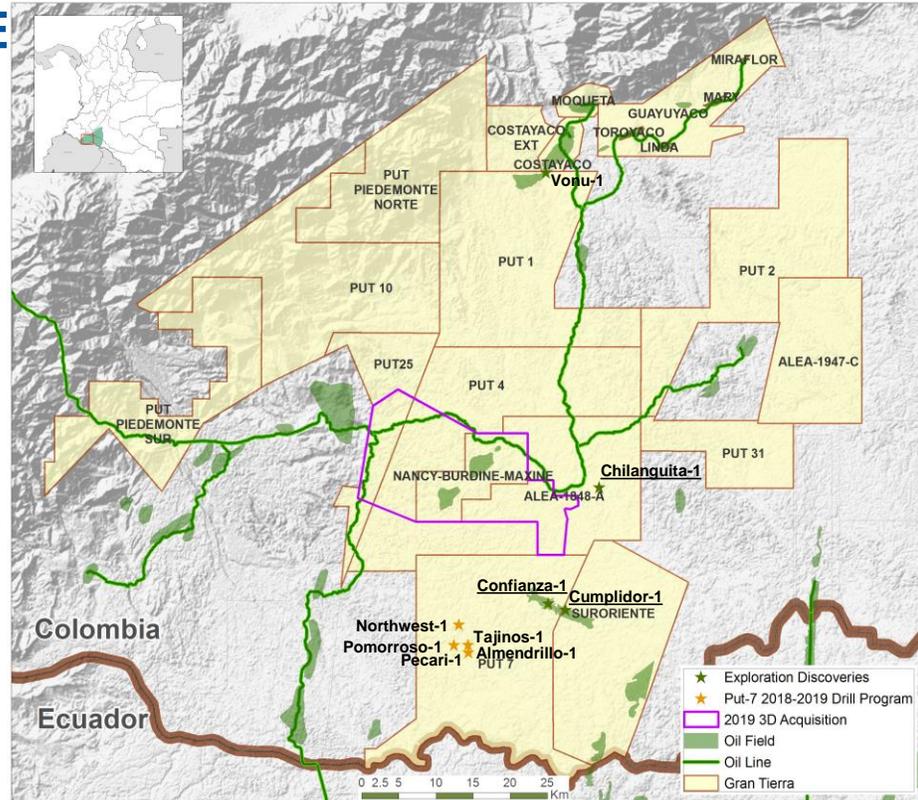

- **3 - 4 appraisal oil wells at Ayombero**
Midas Block (La Luna carbonate)
 - Ayombero-2 appraisal well currently drilling; 2-3 more wells planned
 - Ayombero-1 producing at average rate of 282 bopd, no water
- **Forecasted growth in Acordionero oil production**
4 development oil wells, expansion of production facilities & waterflood
 - Oct.01-Dec.16/2018 average production = 21,625 boepd
- **Costayaco-7 (Potential New Carbonate Play)**
 - Recompleted into M2 Limestone, producing 318 bopd, 29° API oil, 151 bbl/day of completion fluid; estimated capability of 700-1,000 bopd
- **5 exploration wells, PUT-7 Block**
(N & U Sands, A-Limestone)
 - Pomorosso-1 well currently producing 682 bopd, 35° API oil; estimated capability of 1,000 bopd
 - Almendrillo-1 currently drilling, 3 more wells planned
- **1 exploration well, Alea 1848A Block**
 - Chilanguita-1: planned start of A Limestone testing before Dec.31/2018

Multiple catalysts: potential to positively impact 2018 year-end reserves, 2018 exit rate &/or 2019 production

PUTUMAYO BASIN UPDATE

PUT-7 Block Exploration Drilling Campaign¹

- Pomorroso-1 Exploration Well
 - Log evaluation indicates up to seven potential prospective zones at Pomorroso-1 well
 - Post stimulation, the first tested zone is producing 35° API oil at an average rate of 682 bopd on jet pump
 - With Electrical Submersible Pump (ESP), well expected to produce 1,000 bopd +
- Upcoming Exploration Catalysts:
 - Almendrillo-1: drilling ahead (same pad as Pomorroso-1)
 - Pecari-1, Tajinos-1 and Northwest-1: the rig is then expected to drill in sequence these 3 wells from same pad
 - All 4 exploration wells designed to test the same multi-zone potential as Pomorroso-1

Pomorroso-1 exploration well expected to produce over 1,000 bopd of light oil on an ESP

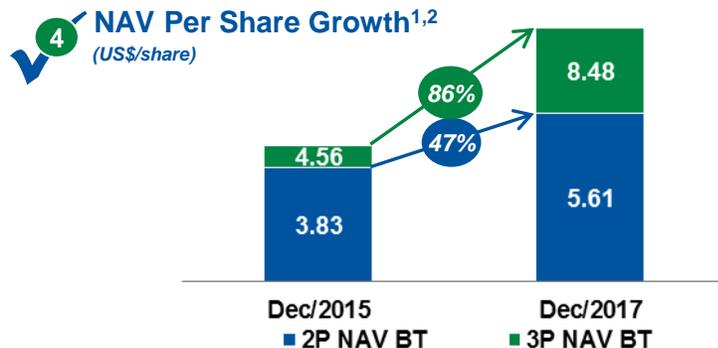

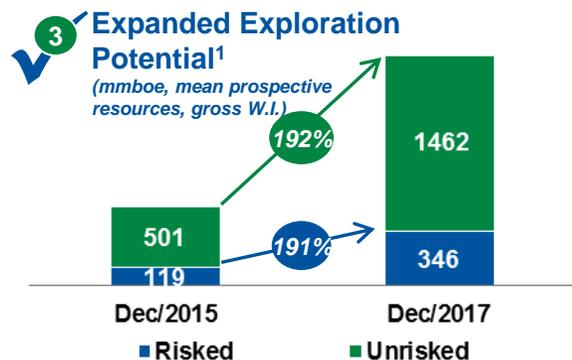

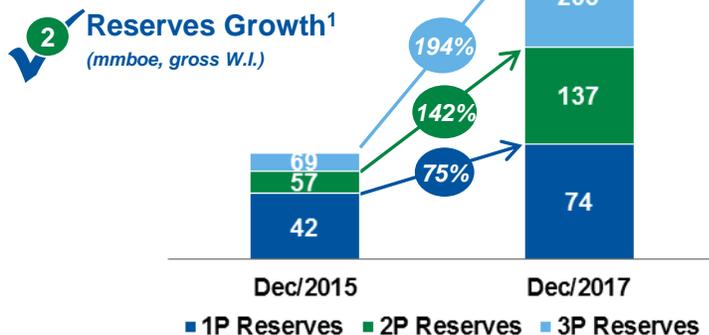

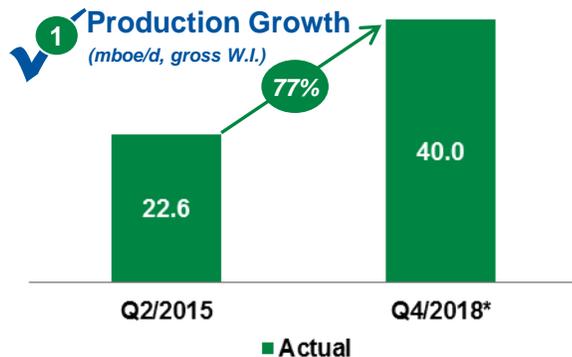

LISTING ON LONDON STOCK EXCHANGE

- Trading of GTE's common shares on London Stock Exchange (LSE) commenced on October 10, 2018 under the ticker "GTE"; GTE shares continue to trade on NYSE American and TSX
- LSE listing expected to:
 - Facilitate investments for international investors in the UK and across Europe
 - Broaden GTE's investor base by introducing GTE to a wider audience
 - Increase GTE's UK and European based research coverage
 - Provide more direct access to London capital markets

Gran Tierra believes listing on LSE will enhance liquidity for its shareholders

DELIVERING ON OUR FOCUSED STRATEGY

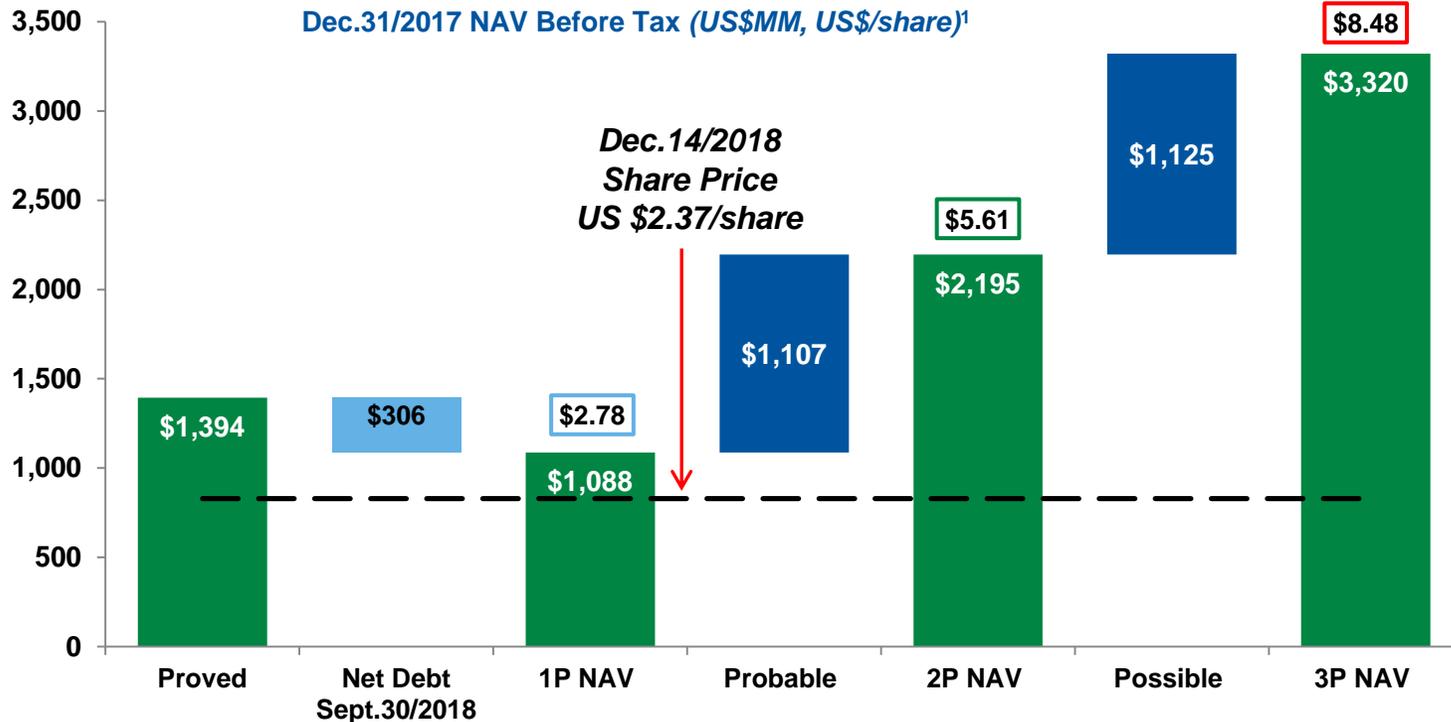

Growth in Colombian reserves/production/exploration potential = shareholder value creation

* As of mid-December 2018

1. Based on actuals and/or 2015 and 2017 McDaniel Reserve Reports and Resource Reports

2. For Dec/17 numbers, based on Oct.30/2018 net debt of \$306 MM (non-GAAP) 3Q18 working capital, less \$115 million in senior convertible notes and \$300 million in senior notes, Oct.30, 2018 share count of 391.3 MM; see "Presentation of Oil & Gas Information" in appendix for more information

NET ASSET VALUE

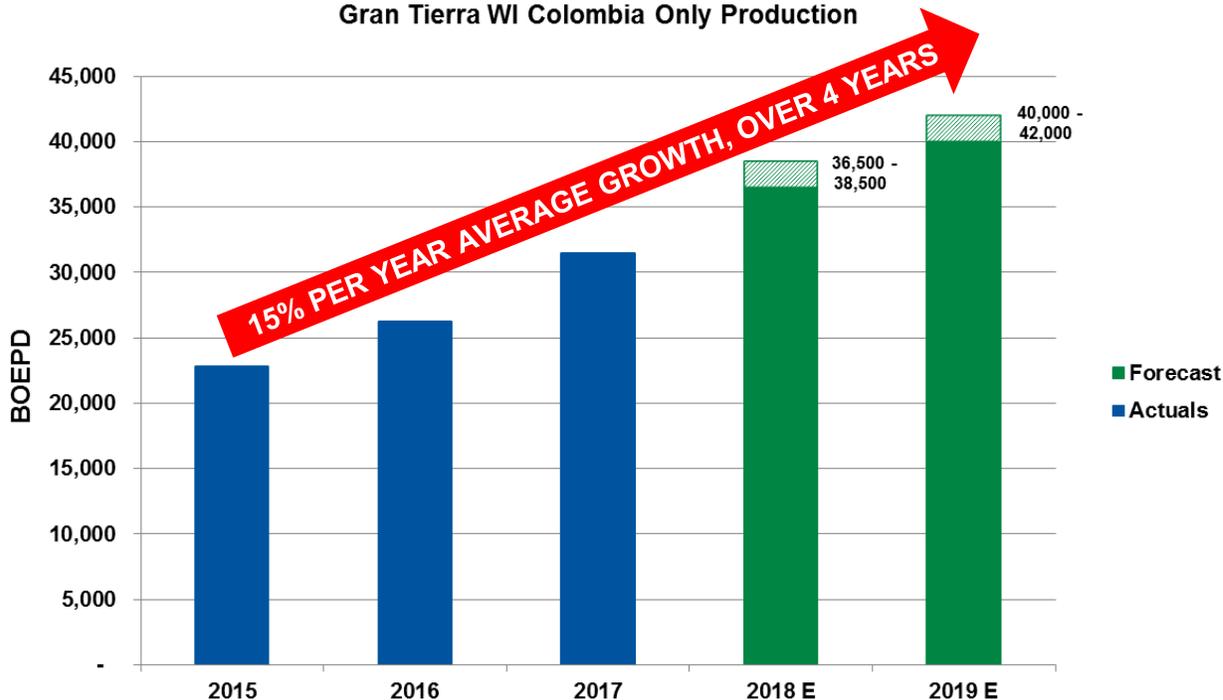

Gran Tierra shares currently trade at a significant discount; 0.4 x of 2P NAV per share

¹ Based on 2017 McDaniel Reserve Report, Sept.30/2018 net debt (non-GAAP) of \$306 MM (3Q18 working capital, less \$115 million in senior convertible notes and \$300 million in senior notes), Oct.30/2018 share count of 391.3 MM; see "Presentation of Oil & Gas Information" in appendix for more information

STEADILY GROWING PRODUCTION

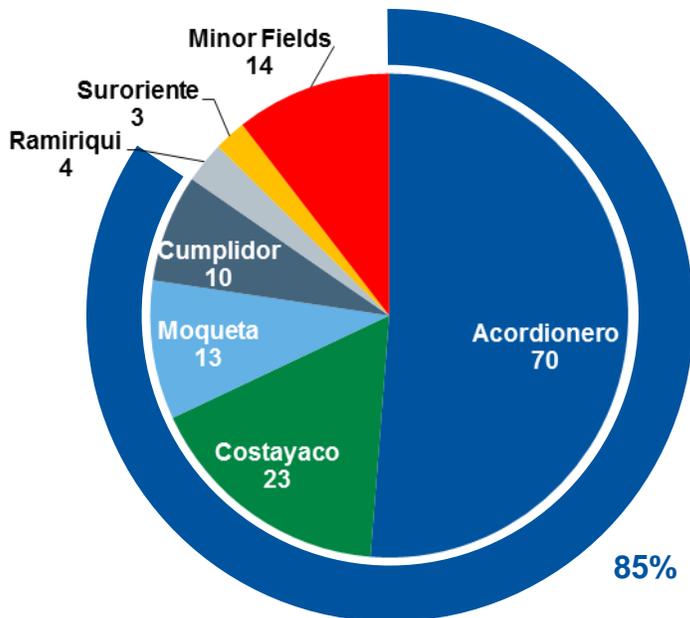

Gran Tierra WI Colombia Only Production

From 2015 to 2019, Gran Tierra forecasts average production growth rate of 15% per year

MATERIAL GROWTH: RESERVES AND VALUE¹

2P Reserves by Property¹ (MMboe)

- 85% of 2P reserves in 4 core fields
- Reserves = 137 MMBOE (99% oil), up 18% y-o-y
- Reserves/share² up 20% y-o-y
- 2P NAV/share up 29%
- Reserves replacement² = 283%

Gran Tierra has created material shareholder value in Colombia

Q3/2018 RESULTS & OPERATIONAL HIGHLIGHTS

	Q3/2018	Q3/2017	Change
WI Production (boepd)	36,170	32,570	11%
Net Income (\$MM)	\$75 MM	\$3 MM	2400%
Funds Flow (\$MM) ¹	\$85 MM	\$55 MM	54%
Capital Expenditures (\$MM)	\$101 MM	\$72 MM	42%
Operating Netback (\$/boe) ¹	\$37.52	\$23.58	59%
Cash Netback (\$/boe) ¹	\$25.49	\$18.45	38%
EBITDA (\$MM) ¹	\$117	\$60	93%
Net Debt (\$MM)	\$306	\$256	19%
Annualized ³	Q3/2018	Q3/2017	Change
EBITDA (\$MM)	\$467	\$242	93%
Funds Flow (\$MM)	\$340	\$221	54%
Net Debt/EBITDA	0.7x	1.1x	-0.4x

- **Record Quarterly Production²**
 - Q3/2018 averaged 36,170 BOEPD
 - Current production of approximately 40,000 BOEPD as of mid-December 2018
- **Solid Financial Performance²**
 - Record net income of \$75 MM, Funds Flow \$85 MM, Capital Expenditures \$101 MM
 - Operating Netback \$37.52/boe¹
 - Cash Netback \$25.49/boe¹
- **Key Results²**
 - Record production at Acordionero (averaging 21,625 boepd so far Q4/2018, up to Dec.16/2018)
 - Continued consolidation of Putumayo & MMV asset base by acquiring 45% WI in PUT-1 (GTE now 100% WI) and 60% WI & operatorship of VMM-2

GTE has achieved record company production

1. Funds Flow, EBITDA, Operating Netback & Cash Netback are Non-GAAP measures; see "Presentation of Oil & Gas Information" in appendix for more information and reconciliations to net income (for Funds Flow & EBITDA) or to oil and natural gas sales (for Operating & Cash Netback)
 2. See Gran Tierra press releases dated December 18, 2017, May 1, 2018, August 2, 2018 and November 1, 2018 for more details and disclaimers
 3. Annualized EBITDA and Funds Flow based on respective Q3/2018 and Q3/2017 numbers

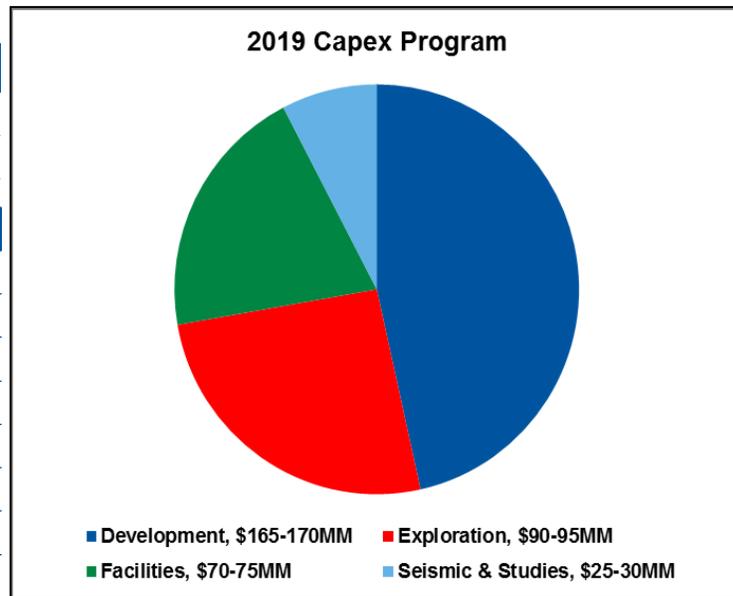

2019 GUIDANCE¹ – GROWTH WITHIN CASH FLOW

Production Guidance		Capital Guidance	BASE/HIGH	LOW
WI Production (boepd)	40,000 – 42,000	Total Capital (\$MM)	\$350-370	\$300-320

y-o-y growth² 12 – 18%

Cash Flow Guidance	BASE	HIGH	LOW
Brent (\$/bbl)	\$65	\$75	\$55
Cash Flow ³ (\$MM)	\$365-375	\$435-445	\$290-300

Expense & Operating Netback Guidance (\$/boe)	Brent \$65.00/bbl
Transportation & Quality Discount	\$11.00 - \$13.00
Royalties	\$9.00 - \$10.00
Operating Costs	\$8.50 - \$9.50
Transportation Costs (Pipeline)	\$1.50 - \$2.50
Operating Netback⁴	\$30.00 - 35.00
General and Administrative	\$1.50 - \$2.00
Cash-Settled Stock-Based Compensation	\$0.90 - \$1.00
Interest and Financing	\$1.50 - \$2.00
Taxes	\$3.50 - \$4.50

GTE forecasts significant 2019 production growth (12% to 18%), funded by cash flow

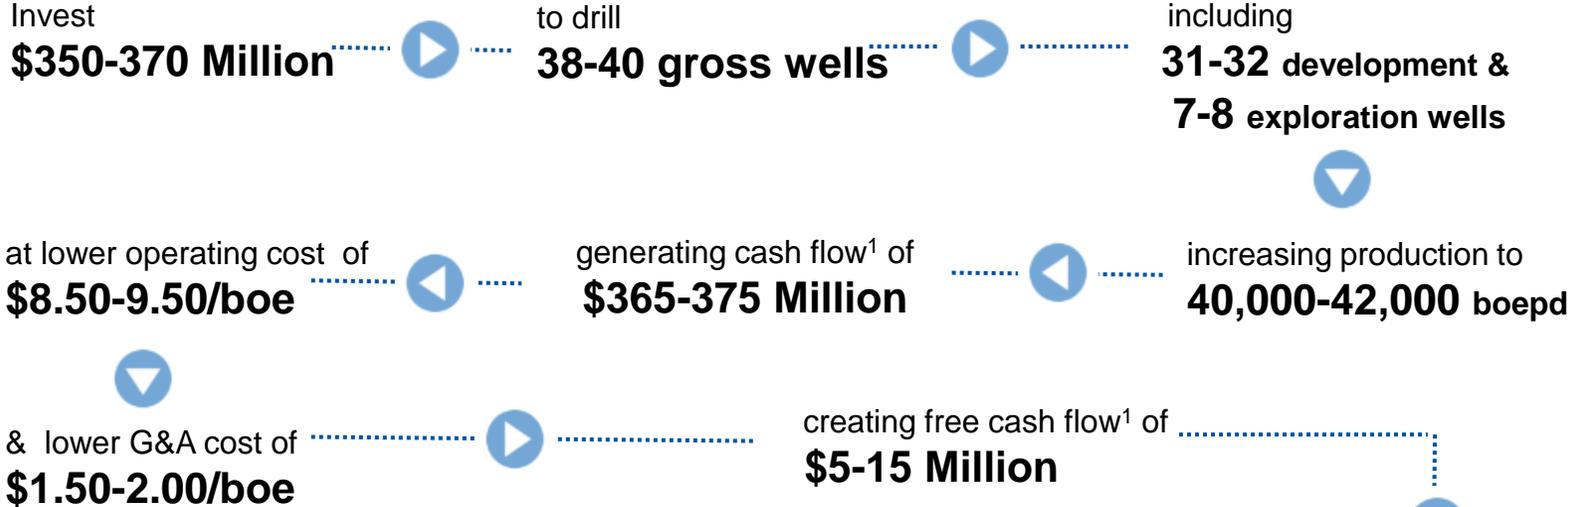

1. See Gran Tierra press releases dated December 17, 2018 for more details and disclaimers

2. YoY growth calculated as 2019 W.I. production guidance range over 2018 YTD average W.I. production of 35,683 BOEPD (as of Sep.30/2018)

3. "Cash flow" means the GAAP measure "net cash provided by operating activities"

4. Operating netback is a non-GAAP measure and does not have a standardized meaning under GAAP; refer to "Non-GAAP Measures" in press release dated Dec.17/2018 for a description; estimated 2019 operating netback is calculated by subtracting 2019 forecasts of transportation and quality discount, royalties, operating costs and pipeline transportation from the 2019 budget Brent oil price forecast as outlined in the table above

2019 GUIDANCE

- Results:**
- ✓ Operating Netback² of \$30.00-35.00/boe
 - ✓ Year-end Net Debt³/Cash Flow¹ of 0.8-1.0 x
 - ✓ Fully funded development & exploration campaign

Gran Tierra's 2019 budget is expected to deliver material growth in net asset value per share

1. "Cash flow" refers to the GAAP line item "net cash provided by operating activities"; "free cash flow" refers to the GAAP line item "net cash provided by operating activities" less projected 2019 capital spending.
 2. "Operating netback" is non-GAAP measure, doesn't have standardized meaning under GAAP; refer to "Non-GAAP Measures" in press release dated Dec. 17/2018 for description; estimated 2019 operating netback is calculated by subtracting 2019 forecasts of transportation & quality discount, royalties, operating costs & pipeline transportation from 2019 budget Brent oil price forecast as outlined in previous slide.
 3. "Net debt" (non-GAAP) is an estimate of 2019 year-end cash less \$115 million in senior convertible notes and \$300 million in senior notes.

2019 CAPITAL PROGRAM DETAILS¹

Development Capital (\$235-245 MM; ~65%)

Acordionero (MMV)

- Drill 14 wells: 9 development & 5 water injection
- Ongoing CPF expansion
- Expand gas-to-power project to 20MW
- Initiate natural gas injection project

Putumayo Basin & Minor Fields

- Drill 13-14 development wells
- Drill 3 injection & 1 water source wells
- 7-8 workovers, reactivations &/or stimulations

New truck loading facility

Acordionero CPF Expansion

New storage tanks and new processing equipment under construction

Exploration Capital (\$115-125 MM; ~35%)

Putumayo

- Drill 4-5 exploration wells
- 3D seismic surveys (340 km²)

MMV

- Drill 2 exploration wells

Llanos

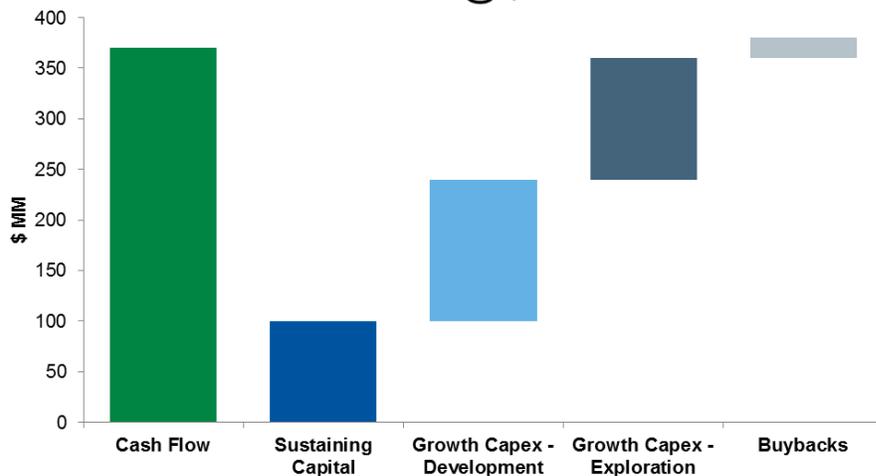

- Drill 1 exploration well

GTE's 2019 capital program is expected to be fully funded by cash flow

SUSTAINABLE BUSINESS MODEL¹

Self-Funding Business

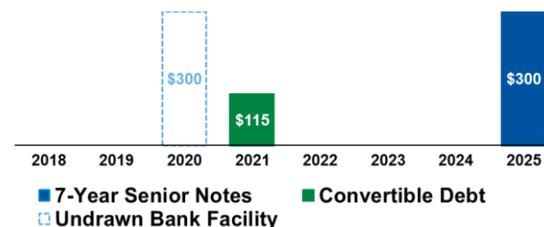

Cash Flow & Uses @ \$65/bbl Brent

Low Debt Levels

- 2019F net debt² to cash flow³ of 0.8-1.0x @ \$65/bbl Brent
- No near-term maturities:

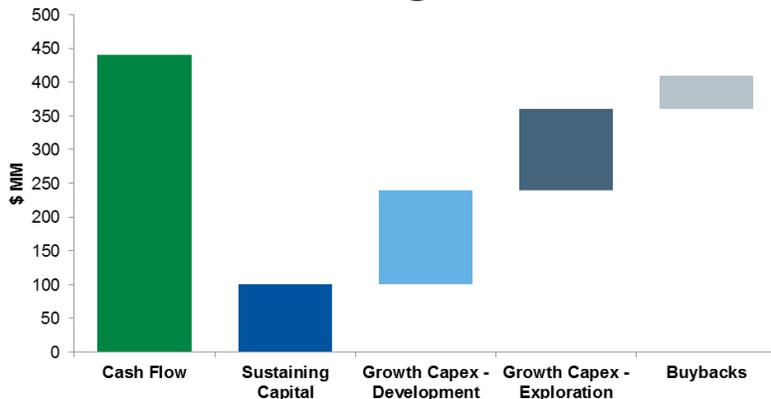

Debt Maturity Profile (\$MM)

Gran Tierra has created a self-funded, sustainable business model

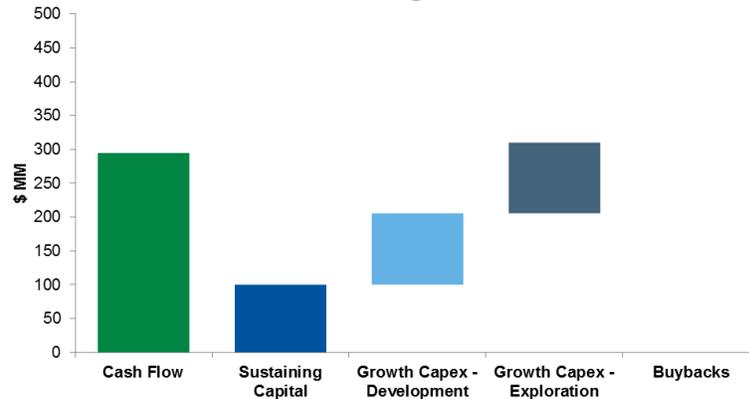

CASH FLOW & USES SENSITIVITY¹

Cash Flow & Uses @ \$75/bbl Brent

○ 2019F net debt² to cash flow³ of 0.7-0.9x @ \$75/bbl Brent

Cash Flow & Uses @ \$55/bbl Brent

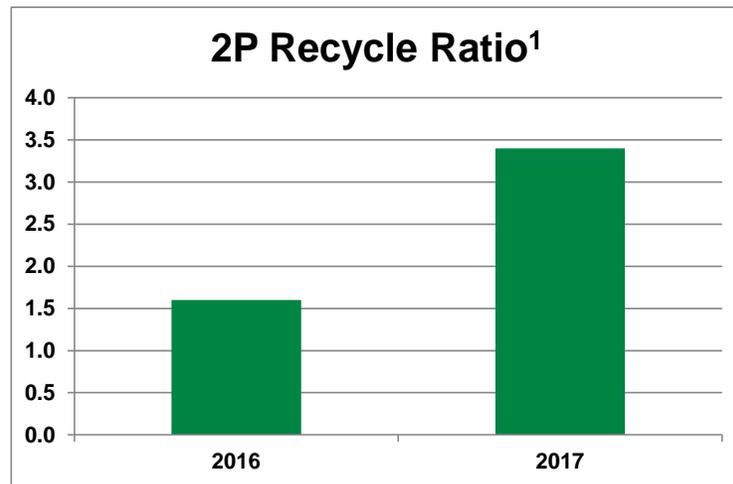

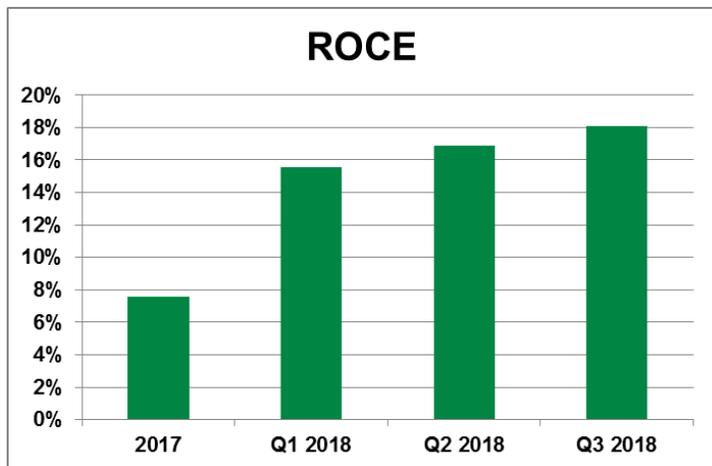

○ 2019F net debt² to cash flow³ of 1.1-1.3x @ \$55/bbl Brent

Gran Tierra is positioned to create value in a variety of oil price scenarios

DEPLOYING CAPITAL PROFITABLY

- GTE already generates high return on capital employed (“ROCE”), over 15% YTD in 2018
- Over time, GTE to ROCE to trend towards long-term internal rate of return target of 20%+

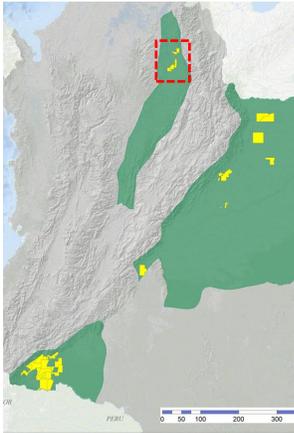

- High recycle ratios demonstrate the value of re-investing in GTE’s business
 - 2017 F&D cost of \$8.53 per bbl¹; Q4 netback \$28.61 per bbl
- Solid recycle ratio even during poor oil prices in 2016 shows resilience of GTE’s assets

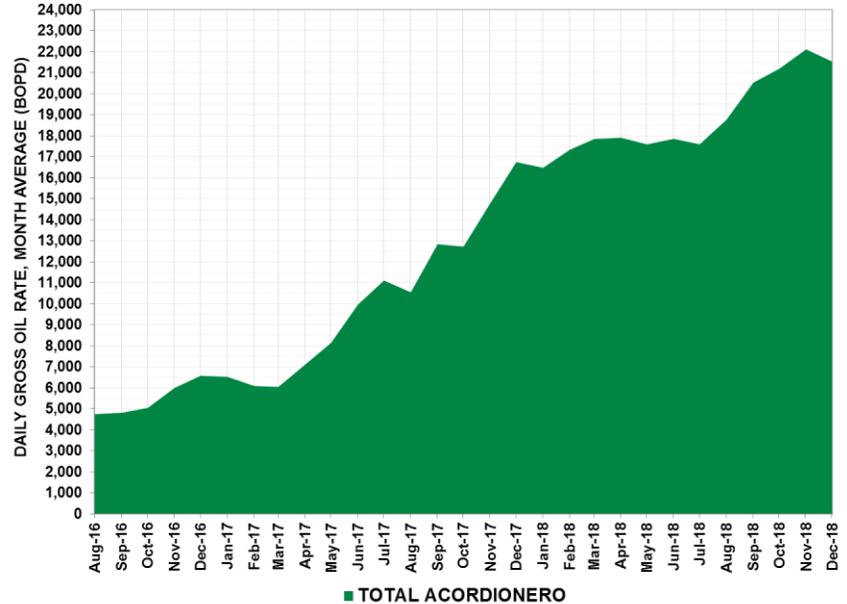

Gran Tierra is focused on growing value, not just growing barrels

ACORDIONERO (MMV) – SNAPSHOT

- **Acordionero: major oil producing asset in MMV**
 - GTE increased field's production by 357% since acquisition, all while generating free cash flow
- **Near-term production growth engine**
 - 4Q/2018 production of 21,625 BOEPD (W.I.), (average from Oct.01 to Dec.16/2018)
 - 2019 2P production forecast = ~23,000 BOEPD (W.I.)
 - 2P W.I. reserves¹ of 70.2 MMBOE
 - Self-funding cash flow for development

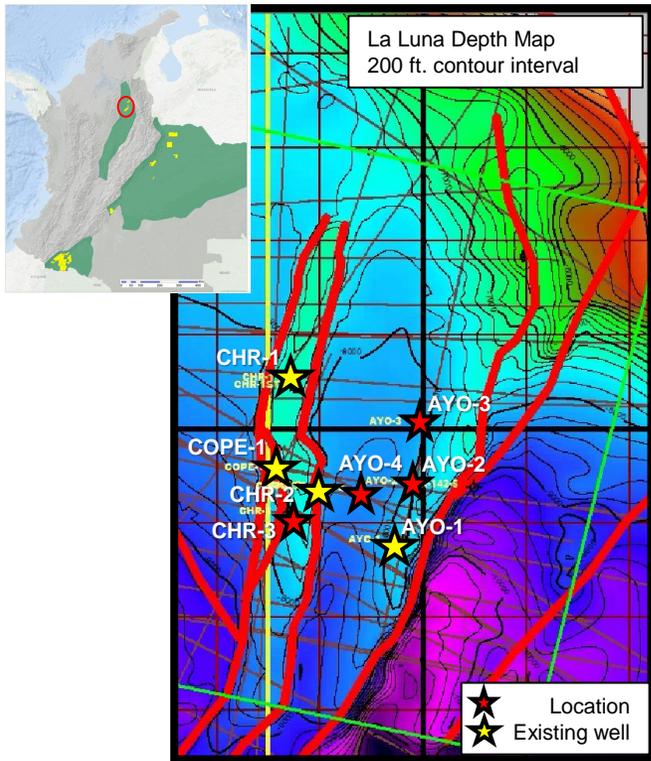

ACORDIONERO GROSS FIELD OIL PRODUCTION

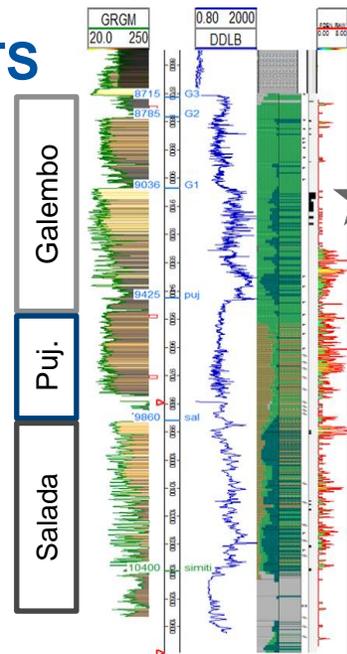

Production has more than quadrupled to 21,625 BOEPD in last 27 months, while generating free cash flow

AYOMBERO-1: EXCITING MMV LA LUNA RESULTS

- **Spud Nov. 13, 2017**
- **Galemo member:**
 - 200-275 ft of net oil pay
 - Only 70 ft perforated to date
 - Natural flow of ~280 bopd of 19°API, no water
- **Pujamana member:**
 - Upside yet to be tested
- **Ayombero-2 currently drilling, 2-3 more appraisal wells planned for Q4/2018 – Q1/2019**
- **Chuirra-3 appraisal well location also identified**

GROSS WI PROSPECTIVE OIL RESOURCES (MMBBL)¹

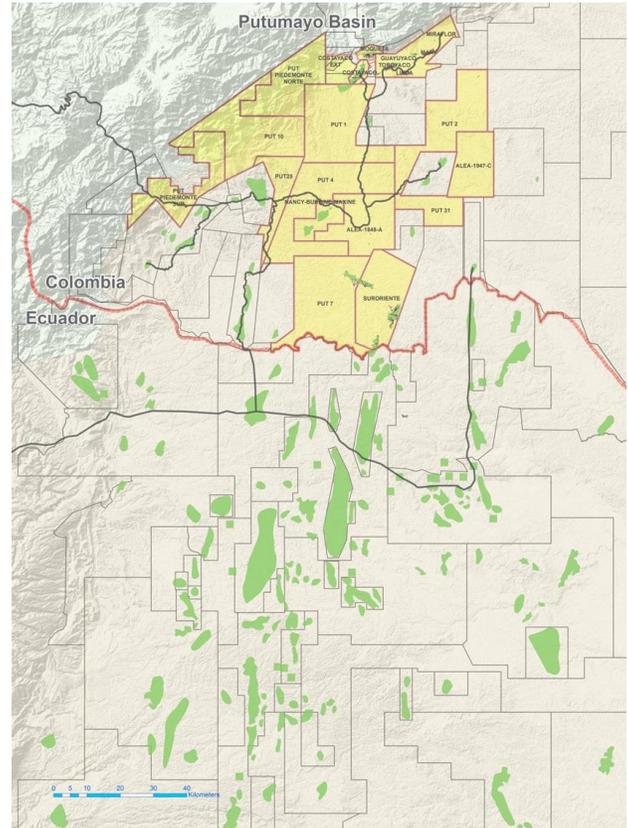

Unrisked				Risked
Low	Median	Mean	High	Mean
22.3	54.6	66.0	123.7	31.4

Appraisal/development of Ayombero/Chuirra structure planned after positive Ayombero-1 results

¹ See May 1, 2018 operational update press release for more details and applicable disclaimers

PUTUMAYO – SNAPSHOT

- **Dominant land position & proprietary seismic database**
 - GTE: largest landholder (1.1 million gross acres) & operates 14 out of 15 blocks
 - Substantial seismic database covering much of basin
 - Unrisked Mean Prospective Resources¹: 1,155 MMBOE (297 MMBOE risked)
- **Underexplored, proven basin with multiple horizons**
 - Historically underexplored due to above ground security issues which have been resolved by the peace agreement
 - To date, Caballos, T & U Sands have produced most of the oil
 - New horizons now emerging: N Sands & several carbonate plays, including A-Limestone
 - Same geology as Ecuador, where almost 6 billion bbls oil have been produced to date²

Dominant position built in a proven basin, with infrastructure in-place

PUTUMAYO BASIN STACKED PAYS

N Sands Stratigraphic Play

- Discoveries/appraisal: Cumplidor-1 & 2, Alpha-1, Confianza-1, Nancy-1
- Amplitudes identifiable on seismic
- Statistically high COS
- Play fairway captured, near term tests planned

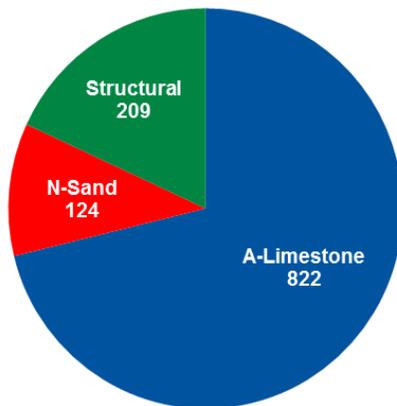

Carbonate Stratigraphic Plays

- A-Limestone has produced from 6 wells at Costayaco, as well as Vonu-1 and Confianza-1
- Regionally extensive carbonate platform
- A-Limestone learnings will be applied to other limestones such as M2 & B-Limestones

Upside in U / T / Caballos – Structural and Stratigraphic

- Stratigraphic discovery at Confianza-1
- Re-mapping Costayaco for further upside given recent CYC-30 results

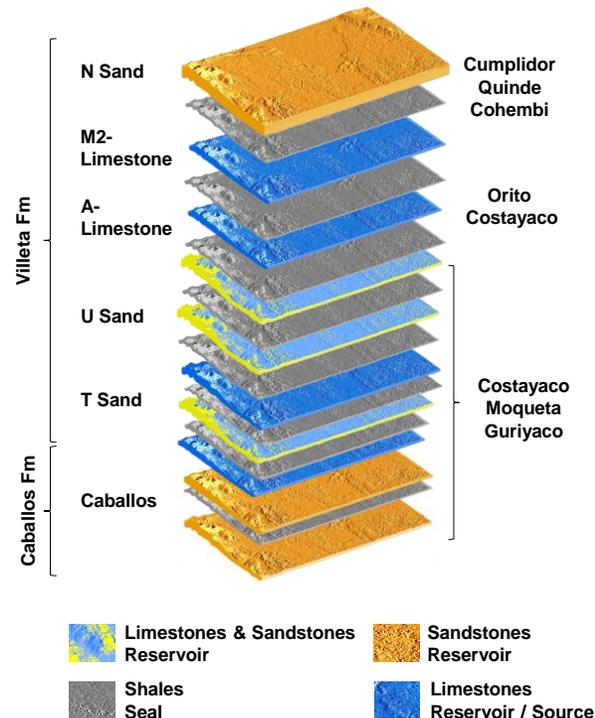

Dec.31/2017 Putumayo Prospective Resources¹ (MMboe)

Total: ~1.2 billion boe

OIL RESERVOIR

ANALOG FIELDS

Putumayo basin is underexplored; Gran Tierra is at the forefront

TRANSPORTATION OPTIONALITY

- Ample takeaway capacity and no infrastructure bottlenecks to GTE's operations
 - Spare capacity exists in many pipelines due to Colombian production declining from >1 MMbbl/d in early 2015 to ~0.85 MMbbl/d in 2018YTD
 - Trucking is priced in Colombian pesos and can be very economical alternative to pipelines
- Through major export terminals, GTE has access to world markets, including Asia, US (West, East & Gulf Coasts) & Europe

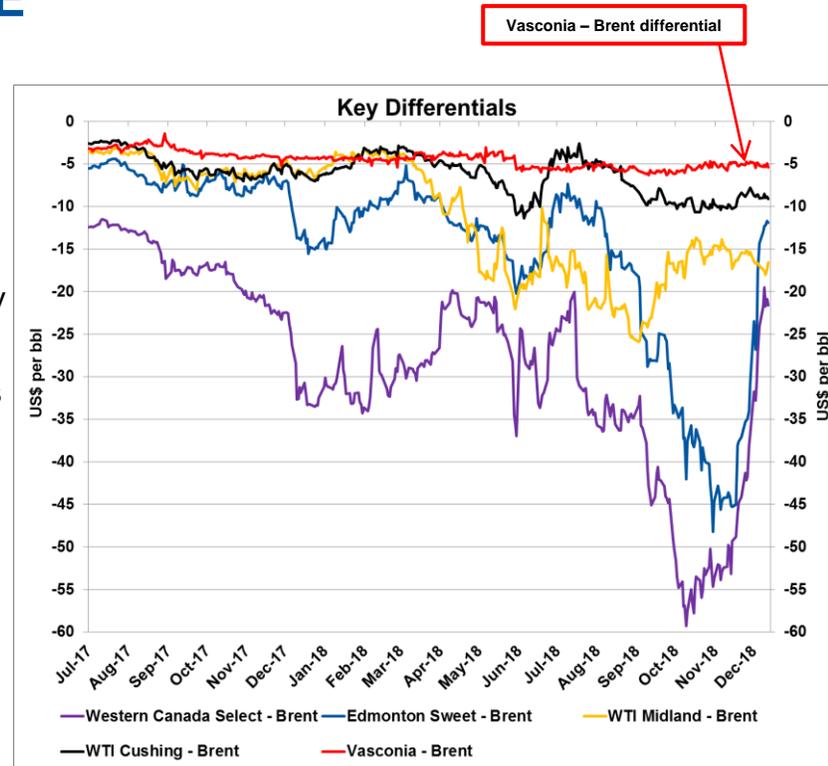

Area	Transportation	Export Point
Putumayo <i>(Costayaco, Moqueta, Others)</i>	Truck + pipeline	Esmeraldas <i>(Ecuador)</i>
	Pipeline	Tumaco <i>(Colombia)</i>
	Truck or truck + pipeline	Coveñas <i>(Colombia)</i>
Middle Magdalena <i>(Acordionero, Others)</i>	Truck or truck + barge	Puerto Bahía <i>(Colombia)</i>
	Truck or truck + pipeline	Coveñas <i>(Colombia)</i>

Significant flexibility in transportation arrangements

OIL PRICE UPSIDE EXPOSURE

- GTE produces nearly 100% oil; all crude sales contracts use Brent as the reference price
- Strong netbacks and clean balance sheet reduce need for long-term hedging
- Crude oil prices strong in Colombia with steady differentials, unlike in the U.S. & Canada
 - Availability of multiple transportation options keeps differentials in check
 - Vasconia-Brent differential has averaged approximately $-\$4.80/\text{bbl}$ over the past 10 years, with a monthly low of $-\$0.16/\text{bbl}$ and monthly high of $-\$8.33/\text{bbl}$

Crude oil prices strong in Colombia with steady, narrow differentials, unlike in U.S. & Canada

ENVIRONMENTAL, SOCIAL & GOVERNANCE EXCELLENCE

	Safety	Greenhouse Gas Emissions	NaturAmazonas Project
Vision	GTE is committed to being an industry leader in Health and Safety . We strive to eliminate all accidents by applying best safety practices and engaging our entire workforce.	GTE voluntarily discloses greenhouse gas (GHG) emissions with goal of reducing intensity of these emissions on year-over-year basis.	GTE has positive impact on areas where it operates and contributes to preservation of key ecosystems in the Amazonian region of Colombia
Key Results	In 2017, GTE achieved best safety record in Company's history and in mid-Jul.2018, GTE reached important Safety Milestone with no Lost Time Injury for 5 Million Person-Hours, all during very active years of record production & increasing drilling and development activities.	Voluntary projects underway to eliminate routine flaring and use gas to generate power will reduce emissions by 9000 tonnes of CO ₂ /year.	Partnership with Conservation International, largest voluntary industry-funded conservation project in Colombia. GTE funding \$11MM over 5 years, to sequester 8.7 million tonnes of CO ₂ over project lifetime ¹ .

GTE received 3 awards in 2018: two from the Colombian National Hydrocarbons Agency for leadership in Supply Chain and Human Resources projects and one Social Responsibility award at the "Women as Game Changers" event hosted by the Society of Petroleum Engineers Colombia

GTE goes beyond compliance to ensure safety, conservation and durable social benefits

¹. Estimate provided by Conservation International

KEY INVESTMENT ATTRIBUTES

High Quality Assets

Accretive Production/Reserves Growth

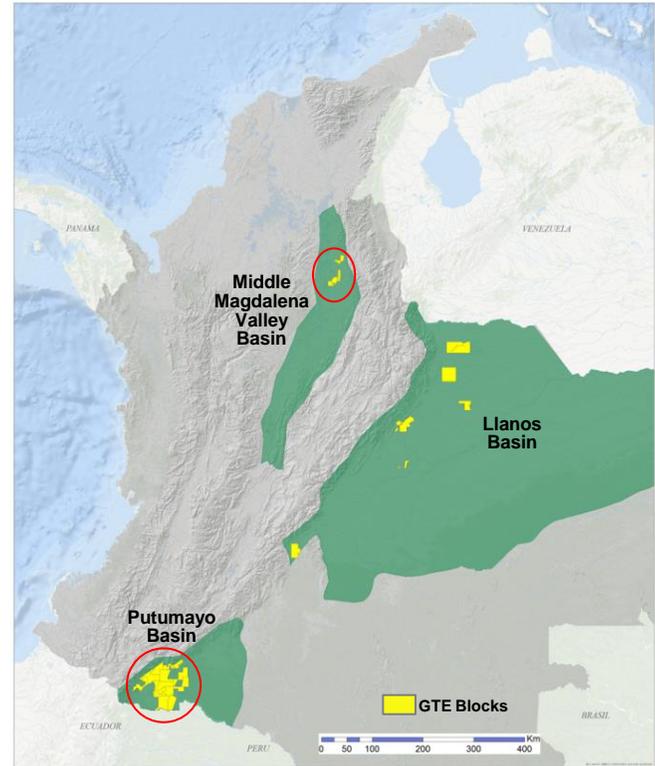

High Impact Exploration

Funded Through Cash Flow

Significant Exposure to Higher Oil Prices

Sustainable business model, expected to be fully funded by forecasted cash flows

Appendix

HIGHLY EXPERIENCED MANAGEMENT TEAM

Name	Title	Experience	
Gary Guidry	President & CEO	Professional Engineer registered with APEGA with over 35 years of experience; prior to Gran Tierra, was President & CEO of Caracal Energy, Orion Oil & Gas and Tanganyika Oil	  
Ryan Ellson	CFO	Chartered Accountant with over 17 years' experience; prior to Gran Tierra, was Head of Finance at Glencore E&P Canada, and prior thereto was VP Finance at Caracal Energy	 
Manuel Buitrago	Colombia Country Mngr.	Over 17 years of experience in international corporate finance and business development roles working for publicly listed companies	 
Ed Caldwell	VP HSE	27 year career with ExxonMobil, Imperial Oil and Caracal Energy as well as has represented Canadian government at the OECD Energy/Environment Committee	  
Jim Evans	VP Corporate Services	Over 20 years of experience with Orion Oil and Gas and Tanganyika Oil; prior to Gran Tierra, was the Head of Compliance & Corporate Services for Glencore E&P (Canada)	   
Alan Johnson	VP Asset Management	Professional Engineer with over 20 years experience, most recently as Head of Asset Management, Glencore E&P Canada, and prior thereto with Caracal Energy	   
Glen Mah	VP Business Development	Professional Petroleum Geologist, has worked onshore and offshore projects in various petroleum basins in Americas, Africa, Middle East & Asia; Chief Geologist with Tanganyika Oil Company	 
Susan Mawsley	VP Finance and Controller	Chartered Accountant with 25 years of experience; prior to joining Gran Tierra in 2011, she was an independent consultant	
Rodger Trimble	VP Investor Relations	Professional Engineer with over 30 years of experience including with Caracal Energy, Canadian Hunter Exploration and Apache; prior to Gran Tierra, was Head of Corporate Planning with Glencore E&P Canada	  
Lawrence West	VP Exploration	35+ years experience, most recently as VP Exploration at Caracal Energy, and prior held several management and executive positions focused in Western Canada	   

Experienced team with a proven track record of operational success and prudent financial management

2015 TO 2018: A TRANSFORMED COMPANY

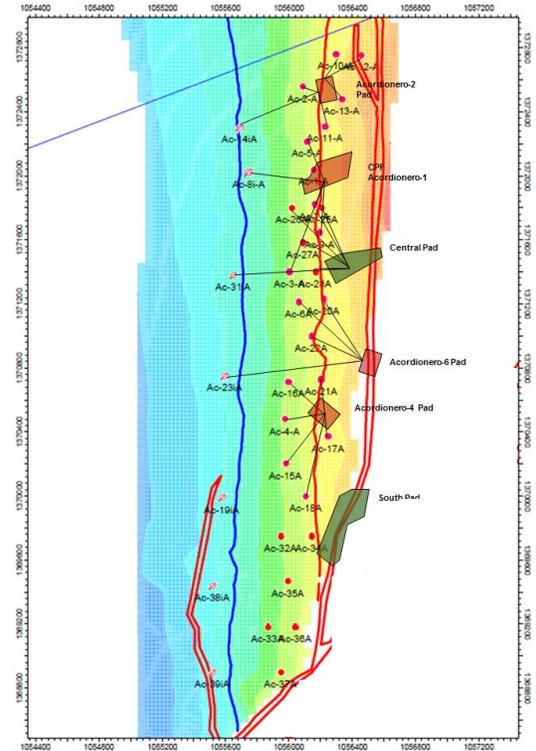

2015 Key Goals	Achieved?	Where We Are Now in 2018
Visible Reserves & Production Growth	✓	2P Reserves up 142%, Production up 60%, RLI = ~11 yrs
Focus on Colombia	✓	Brazil assets sold, Peru assets spun out
Consolidate Putumayo Basin	✓	Petroamerica, PetroGranada, Ecopetrol & Vetra acquisitions added operated interests in 19 blocks & 0.9MM W.I. acres
Diversify in Colombia	✓	PetroLatina acquisition: new core area in Middle Magdalena Valley Basin, producing 19,563 BOEPD
Exploration Portfolio Focused on Quality, Cycle Time, Risk	✓	Tripled WI Unrisked Mean Prospective Resources to 1.5 billion BOE, inventory of 30-35 exploration wells for next 3 years

GTE has delivered on all key goals set in mid-2015 after management change

ACORDIONERO (MMV) ASSET OVERVIEW

Overview	<ul style="list-style-type: none"> Low decline rate for existing production of ~14%^{1,3} 100% working interest (operator) High netback ~19° API oil Stacked pay: <ul style="list-style-type: none"> Thick, permeable oil pay in Lisama A & C New discoveries in Lisama D (AC-8i & Mochuelo) Field currently powered by diesel and natural gas; plans to shift entirely to natural gas in 2019 												
Development Plan	<ul style="list-style-type: none"> 1-2 rigs running continuously through H2/2018 Waterflood commenced in Q4 2017 Full 2P development: 28 oil wells; 6 water injectors^{2,3}

Significant free cash flow generation from core properties

LARGE PUTUMAYO SEISMIC DATABASE

- Gran Tierra has a substantial proprietary seismic database covering much of the Putumayo Basin
 - 3D: 1,716 km²
 - 2D: 16,807 km
- N Sand and A-Limestone plays are clearly defined by seismic
- New 3D seismic surveys in PUT-7 block designed to better define additional prospects

Gran Tierra's Putumayo proprietary seismic database is a competitive advantage

FUNDS FLOW & EBITDA RECONCILIATIONS

Non-GAAP Measures

This presentation includes non-GAAP financial measures, as further described. Funds flow from operations, as presented, is net income adjusted for DD&A expenses, deferred tax expense or recovery, stock-based compensation expense, amortization of debt issuance costs, cash settlement of RSUs, unrealized foreign exchange, financial instruments gains and losses, and cash settlement of financial instruments. EBITDA, as presented, is net income adjusted for DD&A expenses, interest expense and income tax expense or recovery. Management uses these financial measures to analyze performance and income generated by our principal business activities prior to the consideration of how non-cash items affect that income, and believes that these financial measures are also useful supplemental information for investors to analyze performance and our financial results. A reconciliation from net income (GAAP) to funds flow from operations is below. EBITDA, as presented, is defined as net income adjusted for depletion, depreciation and accretion ("DD&A") expenses, interest expense and income tax expense or recovery. Management uses this supplemental measure to analyze performance and income generated by our principal business activities prior to the consideration of how non-cash items affect that income, and believes that this financial measure is useful supplemental information for investors to analyze our performance and our financial results. Reconciliations from net income (GAAP) to funds flow from operations and EBITDA are presented below.

	Three month ended September 30			Three month ended September 30	
	2018	2017		2018	2017
Funds Flow From Operations - Non- GAAP Measure (\$000s)			EBITDA - Non- GAAP Measure (\$000s)		
Net Income	75,295	3,130	Net Income	75,295	3,130
Adjustments to reconcile net income to funds flow from operations			Adjustments to reconcile net income to EBITDA		
DD&A expenses	51,630	35,279	DD&A expenses	51,630	35,279
Deferred tax (recovery) expense	(36,769)	13,760	Interest expense	7,404	3,989
Stock-based compensation expense	10,725	1,752	Income tax (recovery) expense	(17,661)	18,093
Amortization of debt issuance costs	816	643	EBITDA	\$ 116,668	\$ 60,491
Cash settlement of RSUs	-	(33)			
Unrealized foreign exchange gain	(672)	(1,380)			
Financial instruments (gain) loss	(4,874)	1,675			
Cash settlement of financial instruments	(10,686)	302			
Funds flow from operations	\$ 85,465	\$ 55,128			

OPERATING & CASH NETBACK RECONCILIATIONS

Non-GAAP Measures

This presentation includes non-GAAP financial measures, as further described. Operating netback as presented is defined as oil and gas sales less operating and transportation expenses. Cash netback as presented is defined as net income before DD&A expenses, deferred income tax expense or recovery, amortization of debt issuance costs, unrealized foreign exchange gains and losses, non-cash operating and G&A expenses and unrealized financial instruments gains and losses. A reconciliation from net income to operating and cash netback is as follows

<u>Per BOE</u>	Three month ended September 30	
	2018	2017
Oil and natural gas sales	52.51	34.72
Operating expenses	(8.81)	(7.32)
Workover expenses	(3.93)	(1.80)
Transportation expenses	(2.25)	(2.02)
Operating Netback	37.52	23.58
G&A Expenses	(1.10)	(2.33)
Severance Expenses	(0.30)	(0.39)
Realized Foreign Exchange Gain (Loss)	0.06	(0.04)
Realized Financial Instruments (Loss) Gain	(3.20)	0.10
Interest Expense, Excluding Amortization of Debt Issuance Costs	(1.98)	(1.12)
Interest Income	0.22	0.10
Current Income Tax Expense	(5.73)	(1.45)
Cash Netback	25.49	18.45

PRESENTATION OF OIL & GAS INFORMATION

BOEs (Barrel of Oil Equivalent) may be misleading particularly if used in isolation. A BOE conversion ratio of 6 thousand cubic feet of gas to 1 barrel of oil is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. In addition, given that the value ratio based on the current price of oil as compared with natural gas is significantly different from the energy equivalent of six to one, utilizing a BOE conversion ratio of 6Mcf:1bbl would be misleading as an indication of value. Unless otherwise specified, in this presentation, all production is reported on a working interest ("WI") basis (operating and non-operating) before the deduction of royalties payable. Per BOE amounts are based on WI sales before royalties. For per BOE amounts based on NAR production, see our Annual Report on Form 10-K filed February 27, 2018.

Well test results should be considered as preliminary and not necessarily indicative of long-term performance or of ultimate recovery. Well log interpretations indicating oil and gas accumulations are not necessarily indicative of future production or ultimate recovery. If it is indicated that a pressure transient analysis or well-test interpretation has not been carried out, any data disclosed in that respect should be considered preliminary until such analysis has been completed.

In this presentation:

- o **"reserves"** are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations, as of a given date, based on: (a) analysis of drilling, geological, geophysical and engineering data; (b) use of established technology; and (c) specified economic conditions, which are generally accepted as being reasonable. Reserves are classified according to degree of certainty associated with estimates.
- o **"proved reserves"** or "1P" are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that actual remaining quantities recovered will exceed estimated proved reserves;
- o **"proved developed reserves"** are those proved reserves that are expected to be recovered from existing wells and installed facilities or, if facilities have not been installed, that would involve a low expenditure (e.g., when compared to cost of drilling a well) to put reserves on production. Developed category may be subdivided into producing and non-producing;
- o **"proved undeveloped reserves"** or "PUD" are those proved reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to cost of drilling a well) is required to render them capable of production.
- o **"probable reserves"** or "2P" are those unproved reserves that are less certain to be recovered than proved reserves. It is equally likely that actual remaining quantities recovered will be greater or less than sum of estimated proved plus probable reserves. Probable reserves may be developed or undeveloped ("PPUD").
- o **"possible reserves"** or "3P" are those additional reserves that are less certain to be recovered than probable reserves. There is a 10% probability that quantities actually recovered will equal or exceed sum of proved plus probable plus possible reserves. Possible reserves may be developed or undeveloped ("PPPUD").
- o **"gross"** means: (a) in relation to the Company's interest in production or reserves, its "company gross" production or reserves, which represents the Company's working interest (operating or non-operating) share before deduction of royalties and without including any royalty interests of the Company; (b) in relation to wells, total number of wells in which the Company has an interest; and (c) in relation to properties, total area of properties in which the Company has an interest.
- o **"NAV"** means net asset value.
- o **"NPV"** means net present value.
- o **"prospective resources"** are quantities of petroleum estimated, as of a given date, to be potentially recoverable from undiscovered accumulations by application of future development projects. There is no certainty that any portion of the prospective resources will be discovered. If discovered, there is no certainty that it will be commercially viable to produce any portion of the prospective resources. Prospective resources have both an associated chance of discovery and a chance of development. Not all exploration projects will result in discoveries. Chance that an exploration project will result in discovery of petroleum is referred to as "chance of discovery." Thus, for an undiscovered accumulation, chance of commerciality is product of two risk components: chance of discovery and chance of development.
- o **"Net debt"** at Sep.30, 2018 of \$306 MM is working capital, less \$115 million in senior convertible notes and \$300 million in senior notes.

PRESENTATION OF OIL & GAS INFORMATION

Reserves and Prospective Resources Information

Unless otherwise noted, estimates of the Company's reserves, net present value of future net revenue attributable to Company's reserves and prospective resources relate solely to the Company's Colombia reserves and prospective resources and are based upon a report with an effective date of December 31 of each year prepared by McDaniel & Associates Consultants ("McDaniel"), the Company's independent qualified reserves evaluator and auditor, in accordance with NI 51-101 – *Standards for Oil and Gas Activities* ("NI 51-101") and the Canadian Oil and Gas Evaluation Handbook ("COGEH") (the "McDaniel Reserve Report" in the case of reserves or the "McDaniel Prospective Resource Report" in the case of prospective resources).

Gran Tierra's Statement of Reserves Data and Other Oil and Gas Information on Form 51-101F1 dated effective as at December 31, 2017 (the "GTE NI 51-101F1"), which includes disclosure of its oil and gas reserves and other oil and gas information in accordance with NI 51-101 forming the basis of this presentation, is available on SEDAR at www.sedar.com.

Estimates of the Company's prospective resources in the Ayombero field are prepared by McDaniel in accordance with NI 51-101 and COGEH as of April 30, 2018. For positive and negative factors associated with the Ayombero field's prospective resources, as well as other relevant information, please see the Company's press release dated May 1, 2018.

Estimates of reserves provided in this presentation are estimates only and there is no guarantee that estimated reserves will be recovered. Actual reserves may be greater than or less than estimates provided in this presentation and differences may be material. Estimates of net present value of future net revenue attributable to Company's reserves do not represent fair market value and there is uncertainty that net present value of future net revenue will be realized and such estimates of reserves and future net revenue for individual properties may not reflect same confidence level as estimates of reserves and future net revenue for all properties, due to effect of aggregation. There is no assurance that forecast price and cost assumptions applied by McDaniel in evaluating Gran Tierra's reserves will be attained and variances could be material. References to thickness of "oil pay" or of a formation where evidence of hydrocarbons has been encountered is not necessarily an indicator that hydrocarbons will be recoverable in commercial quantities or in any estimated volume.

Prospective resources are those quantities of petroleum estimated, as of a given date, to be potentially recoverable from undiscovered accumulations by application of future development projects. Prospective resources have both an associated chance of discovery and a chance of development. Not all exploration projects will result in discoveries. The chance that an exploration project will result in the discovery of petroleum is referred to as the "chance of discovery." Thus, for an undiscovered accumulation the chance of commerciality is the product of two risk components-the chance of discovery and the chance of development. There is no certainty that any portion of the Prospective resources will be discovered. If discovered, there is no certainty that it will be commercially viable to produce any portion of the prospective resources.

The estimates of prospective resources provided in this presentation are estimates only and there is no guarantee that the estimated prospective resources will be recovered. Actual resources may be greater than or less than the estimates provided in this in this press release and the differences may be material. There is no assurance that the forecast price and cost assumptions applied by McDaniel in evaluating Gran Tierra's prospective resources will be attained and variances could be material. There is no certainty that any portion of the prospective resources will be discovered. If discovered, there is no certainty that it will be commercially viable to produce any portion of the prospective resources.

Estimates of prospective resources are by their nature more speculative than estimates of proved reserves and would require substantial capital spending over a significant number of years to implement recovery. Actual locations drilled and quantities that may be ultimately recovered from our properties will differ substantially. In addition, we have made no commitment to drill, and likely will not drill, all of the drilling locations that have been attributable to these quantities.

The following classification of prospective resources is used in this presentation:

- o Low Estimate means there is at least a 90 percent probability (P90) that the quantities actually recovered will equal or exceed the low estimate.
- o Best Estimate means there is at least a 50 percent probability (P50) that the quantities actually recovered will equal or exceed the best estimate.
- o High Estimate means there is at least a 10 percent probability (P10) that the quantities actually recovered will equal or exceed the high estimate.
- o Mean Estimate represents the arithmetic average of the expected recoverable volume. It is the most accurate single point representation of the volume distribution.

PRESENTATION OF OIL & GAS INFORMATION

For a discussion of Gran Tierra's interest in the prospective resources, the location of the prospective resources, the product type reasonably expected, the risks and level of uncertainty associated with recovery of the resources, the significant positive and negative factors relevant to the estimate of the prospective resources, a description of the applicable projects maturity sub-categories and other relevant information regarding the prospective resources estimates, please see the GTE NI 51-101F1.

Oil and Gas Metrics

This presentation contains a number of oil and gas metrics, including finding and development ("F&D") costs, F&D recycle ratio, NAV per share, operating netback, reserve life index, reserves per share and reserves replacement, which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies and should not be used to make comparisons. Such metrics have been included herein to provide readers with additional measures to evaluate the Company's performance; however, such measures are not reliable indicators of the future performance of the Company and future performance may not compare to the performance in previous periods.

F&D costs are calculated as estimated exploration and development capital expenditures in Colombia, excluding acquisitions and dispositions, divided by the applicable reserves additions both before and after changes in future development costs ("FDC"). The calculation of F&D costs incorporates the change in FDC required to bring proved undeveloped and developed reserves into production. The aggregate of the exploration and development costs incurred in the financial year and the changes during that year in estimated FDC may not reflect the total F&D costs related to reserves additions for that year. Management uses F&D costs per BOE as a measure of its ability to execute its capital program and of its asset quality.

F&D recycle ratio is calculated as estimated Colombia fourth quarter operating netback per W1 sales volume divided by the 2P F&D costs per BOE. Management uses F&D recycle ratio as an indicator of profitability of its oil and gas activities. See Jan.30, 2018 press release for more information.

NAV per share is calculated as before tax NPV discounted at 10% plus estimated net working capital deficit and debt, excluding risk management assets and liabilities and investment in PetroTal Corp. shares, and number of shares of Gran Tierra's common stock and exchangeable shares issued and outstanding. Management uses NAV per share as a measure of the relative change of Gran Tierra's NAV over its outstanding common stock over a period of time.

Operating netback is calculated as described in this presentation. Management believes that operating netback is a useful supplemental measure for investors to analyze financial performance and provide an indication of the results generated by Gran Tierra's principal business activities prior to the consideration of other income and expenses.

Cash flow means the GAAP line item "net cash provided by operating activities".

Cash flow after capital is cash flow less 2018 budgeted capital expenditures.

Reserve life index is calculated as reserves in the referenced category divided by the referenced estimated Colombia production. Management uses this measure to determine how long the booked reserves will last at current production rates if no further reserves were added.

Reserve per share is calculated as reserves in the referenced category divided by the number of common stock and exchangeable shares issued and outstanding at December 31. Management uses this measure to determine the relative change of its reserve base over its outstanding common stock over a period of time.

Reserves replacement is calculated as reserves in the referenced category divided by estimated annual Colombia production. Management uses this measure to determine the relative change of its reserve base over a period of time.

ROCE is calculated as earnings before interest and taxes ("EBIT"; annualized, if the period is other than one year) divided by capital employed (total assets minus cash and current liabilities). For 2017, the impairment associated with the sale of the legacy businesses in Peru and Brazil is excluded from EBIT.

PRESENTATION OF OIL & GAS INFORMATION

Disclosure of Reserves and Resources Information and Cautionary Note to U.S. Investors

Unless expressly stated otherwise, all estimates of proved, probable and possible reserves and related future net revenue and prospective resources disclosed in this presentation have been prepared in accordance with NI 51-101. Estimates of reserves and prospective resources and future net revenue made in accordance with NI 51-101 will differ from corresponding estimates prepared in accordance with applicable U.S. Securities and Exchange Commission ("SEC") rules and disclosure requirements of the U.S. Financial Accounting Standards Board ("FASB"), and those differences may be material. NI 51-101, for example, requires disclosure of reserves and related future net revenue estimates based on forecast prices and costs, whereas SEC and FASB standards require that reserves and related future net revenue be estimated using average prices for the previous 12 months. In addition, NI 51-101 permits the presentation of reserves estimates on a "company gross" basis, representing Gran Tierra's working interest share before deduction of royalties, whereas SEC and FASB standards require the presentation of net reserve estimates after the deduction of royalties and similar payments. There are also differences in the technical reserves and resources estimation standards applicable under NI 51-101 and, pursuant thereto, the COGEH, and those applicable under SEC and FASB requirements. The SEC requirements strictly prohibit the Company from including prospective resources in filings with the SEC.

In addition to being a reporting issuer in certain Canadian jurisdictions, Gran Tierra is a registrant with the SEC and subject to domestic issuer reporting requirements under U.S. federal securities law, including with respect to the disclosure of reserves and other oil and gas information in accordance with U.S. federal securities law and applicable SEC rules and regulations (collectively, "SEC requirements"). Disclosure of such information in accordance with SEC requirements is included in the Company's Annual Report on Form 10-K and in other reports and materials filed with or furnished to the SEC and, as applicable, Canadian securities regulatory authorities. The SEC permits oil and gas companies that are subject to domestic issuer reporting requirements under U.S. federal securities law, in their filings with the SEC, to disclose only estimated proved, probable and possible reserves that meet the SEC's definitions of such terms. Gran Tierra has disclosed estimated proved, probable and possible reserves in its filings with the SEC. In addition, Gran Tierra prepares its financial statements in accordance with United States generally accepted accounting principles, which require that the notes to its annual financial statements include supplementary disclosure in respect of the Company's oil and gas activities, including estimates of its proved oil and gas reserves and a standardized measure of discounted future net cash flows relating to proved oil and gas reserve quantities. This supplementary financial statement disclosure is presented in accordance with FASB requirements, which align with corresponding SEC requirements concerning reserves estimation and reporting.

The Company's before tax net present values of 2P reserves prepared in accordance with NI 51-101 and COGEH and discounted at 10% ("PV-10") differs from its US GAAP standardized measure because SEC and FASB standards require that (i) the standardized measure reflects reserves and related future net revenue estimated using average prices for the previous 12 months, whereas NI 51-101 reserves and related future net revenue are estimated based on forecast prices and costs and that (ii) the standardized measure reflects discounted future income taxes related to the Company's operations. The Company believes that the presentation of PV-10 is useful to investors because it presents (i) relative monetary significance of its oil and natural gas properties regardless of tax structure and (ii) relative size and value of its reserves to other companies. The Company also uses this measure when assessing the potential return on investment related to its oil and natural gas properties. PV-10 and the standardized measure of discounted future net cash flows do not purport to present the fair value of the Company's oil and gas reserves. The Company has not provided a reconciliation of PV-10 to the standardized measure of discounted future net cash flows because it is impracticable to do so.

Investors are urged to consider closely the disclosures and risk factors in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and in the other reports and filings with the SEC, available from the Company's website. These forms can also be obtained from the SEC's website at www.sec.gov.
